THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES. WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. THIS IS UNEVALUATED INFORMATION

1. "In Bucharest there are seven raions: Gheorghe Gheorghui-Dej, Stalin, Lenin, Tudor Vladimirescu, 23 August, Grivita Rosie and Nicolae Balcescu. This administrative division of the city replaces the old system of four city sectors. This administrative division was necessary as certain state stores existed only in certain city sectors, while others existed only in the city center.
2. "A correct list of food prices in Rumania should show various prices for each item according to the outlets, grouped, for instance, as below:
  - a. Prices in State Stores, for ration card holders.
  - b. Prices in State Stores on goods available to any citizen.
  - c. Prices in State Administered Cooperatives. (These are about 20% higher than prices in item above.)
  - d. Black market prices. (Black markets are illegal, and dealings with them are punishable by imprisonment for three months to two years. Dealing in black markets is considered 'sabotaj economic'.)
  - e. Prices in Bucharest's markets, for instance: Libor State Market, 6 Martie (this was formerly the Piata Mare Market), Ilie Pintilie (formerly Matushe Necelaru) in the ex Buzesti Square, Vitan (formerly Ciocanul on Dudesii Street, where, apart from the State administered markets, Communist authorities have reopened private shops. These are called Tarabe. They consist of a table covered with tarpaulin to prevent rain damage. These markets, although private, are under State control as far as taxes on commodities are concerned, but not with regard to prices.)
  - f. Prices of various food commodities offered for sale by farmers in the State markets (where a special space is set aside for them), or delivered to the homes of Bucharest clients. (State control on this type of sale is exercised primarily in the interests of sanitation, rather than control of price, etc. At the city limits sanitation checks are made. The control of product quotas due the State is not exercised by officials in Bucharest, but by officials in the Village wherein the farmers reside. They cannot even

go to Bucharest to sell their products until they have delivered their quotas to the State.)

3. "Below is a detailed list of food commodities (and prices) available to any citizen freely, and sold in the State Stores called 'Magazin de Stat, Alimentara' (these are the State administered stores throughout the Bucharest city sector only) and in the stores called 'Comaliment' (these exist only in the city sector):

<u>Sugar:</u> (two qualities)	<u>Quantity</u>	<u>Price in Lei</u>
Zahar tes (powdered sugar) (made at Arad)	kg	9.60
Zahar cubic (loaf sugar) of the Popa Sapca sugar mill which was formerly the Danubianca sugar mill of Giurgiu.	kg	10.00

(Remarks: if sugar is in abundance it is sold up to 1 kg per person; if not, it is sold by the 1/2 kg or 1/4 kg, per person. There were long lines for sugar which was placed in paper bags in advance. Very often the amount of sugar found in the bag did not tally with the amount paid for. Lines used to start at 0500 hours for sugar which became available during periodic distributions arranged by the People's Board or the City-Sector concerned. Any citizen may purchase at these distributions, regardless of whether or not he resides in the sector involved. The procedure for lining up is as follows: a. line to enter store; b. line inside the store in front of the Department of Food Commodities, where patron receives ticket indicating quantity required; c. third line up [perhaps the patron receives his ticket in this line; text is not clear]; d. fourth line, at cashier's booth, where payment for item is made; and e. fifth line where consumer hands his ticket, stamped paid, back to the seller, and collects his sugar. The whole operation lasts hours, but people are used to it and do not complain.)

<u>Butter:</u> (three qualities)		
1st quality	kg	27.00
2nd quality	kg	21.00
3rd quality	kg	19.00

(Remarks: distribution is made in the quantity of 200 grams per person. 1st quality is, of course, the best butter and comes from the Banat region; it is pressed butter; 2nd and 3rd quality are less good, as they contain more water. The quality butter received by the consumer is rarely the quality paid for. The practice of swindling customers is endorsed in the State Stores by all employees, and even officials of the Stores. By preparing in advance the butter packets, store employees (sellers) manage to pass off low quality butter. In this way, the employees of State Stores try to round out their salaries. It is generally accepted that this does go on, and no one complains.)

<u>Cheese:</u>		
Telemea (or Braila), 1st quality	kg	11.00
Telemea, 2nd quality	kg	9.00
Roquefort	kg	27.00
Trappist	kg	19.00
Cascaval	kg	20.00
Gruier Poiana	box of six pieces	15.00

(Remarks: Telemea cheese is not always available. There are long lines for it when it is available. Roquefort, Trappist and Gruier Poiana cheeses were available without lining up at any time. There were long lines for Cascaval.)

- \* These State Stores had centers. An 'Alimentara' was located on Serban Voda No. 1. Each of the stores had certain departments: 'alimentare,' 'pescarie' (fish), 'Bauturi' (drinks), 'rationate' (rationed items), 'branzeturi' and 'Mezeluri' (cheese and salami), etc.

large fishes	kg	8.60

Stuca	kg	7.60
Salau	kg	6.50
Lin	kg	11.60
Ciortan	kg	4.60

[ ] the English names for the last four categories of fish above.

(Remarks: there were unusually long lines for fish, a less expensive food than most. Fish was fresh, due to the fact that it was never in the market long enough to be old. Quantities of fish purchased were so small that when wrapped in paper the item could easily have been lost. Most people brought their own paper from home. The lining up took the same form as in the case of sugar. [see above])

There existed in certain State Stores (Alimentara and Comaliment Stores), a food section for the re-sale of bread. [Perhaps this means 'retail' selling of bread.] Prices for bread in these stores follow:

Bread:	Quantity	Price
white, corn-flower bread	1/2 kilo [kg]	2.18
black bread (rarely available)	kg	2.00
Chifle (cake of breakfast bread)	each	0.33

(Remarks: these State Stores did not have bread for sale to ration-card holders; these made their purchase of bread through the Bread Centers; [see below]).

4. " Bread, besides being sold at the 'bread raion' of the 'Alimentara' and 'Comaliment' State Stores, was sold also through the following State Stores:

- State Bread Centers, called 'Centre de Paine'
- State Bread Centers, called 'Spicul', which also sold other flour products. (One of these centers is located on Blv. 1848, formerly Coltei Street, opposite the State Unified Hospital, No. 2; another was [sic] located at No. 15 Calea Serban Veda.)

Following is a list of breads and similar specialities on sale in these stores:

black, corn-flower bread, on sale in round forms, weighing either 1 or 2 kgs	kg	2.00
white bread, 'Franzela', sold either in a round or long form, either weighing 1/2 kg	kg	4.36
'Chifle', corn, white flour	each	0.33

(Note: these prices correspond exactly with those given above.)

The 'Spicul' Breed Centers also sold various flour products other than breads, but neither the 'Spicul' Bread Centers nor the Bread Centers sold flour itself. This was purchased at the 'Alimentara' and 'Comaliment' State Stores.

5. " Milk: there was no re-sale / sic / milk center in Bucharest. There were, in the city, two or three so-called 'Centre de Lapte' Stores, which were actually milk bars. (One of these is located opposite the Spitalul Unificat No. 2, on Blvd. 1848; another is located near the 'Teatrul Municipal' on Dinicu Golescu Blvd. near the 'Lazar Lyceum' street-car station (behind the RPR Ministry of Construction). The sign on these milk-bars reads: 'Centru Lapte si Derivate'. No milk was on sale by the liter. One could purchase the following, ration-free:

	Quantity	Price in Lei
Glass of milk	glass	1.00
Glass of 'lapte batut' (sour milk)	glass	0.50
'Chifla' bread	each	0.50

Note: during the summer, Rumanians are apt to drink milk, but usually sour milk and a 'chifla'. It is noteworthy that the price per 'chifla' increased in milk-bars to 0.50 Lei, from 0.33 Lei in Bread Centers. The sale of milk, in quantities larger than above, is effected through private transactions between farmers and citizens of Bucharest. State Control is exercised at the city limits, but only for sanitation reasons. At the city limits, milk is checked to see that it has not been watered and that it corresponds to standard milk. It is checked with a lactometer. The price at which farmers sell milk depends upon the clients and the current Bucharest free market milk price; this price is established and enforced by all milkmen and women in a fraternal way. Following are the prices usual for milk and cheeses sold directly to consumers by the farmers:

good quality milk (but definitely watered)	L	4.00
'Smantana' (milk-cream / light cream? / (Price depends upon quality).	Kilo	18.00 to 20.00
'Branza de vaca' (cow-cheese), sold by the piece, each weighing 100-125 grams	piece	3.00

There were also State Milk Centers which received the milk from farmers in surrounding cities and villages and from the State Administration Farms. One such Center is located at Martie Square (formerly the Piata Natiei) at the corner of the Serban Voda Bridge on the Dambovitza River. These Centers serve as distribution centers for all state institutions, enterprises, etc., and all state employees. Each state employee is entitled to 1/2 liter of milk per day. Each member of his family is likewise entitled to 1/2 liter of milk per day. Each morning the state institution collects, by its own means of transportation, the milk it needs for its employees that day. Distribution takes place at the place of work after the working day begins, so that it is impossible for the employees to take home their milk. Employees' wives are permitted to come to the factory to pick up the family milk ration. Distribution delay at the factory, however, causes these families to buy from the farmers in their locality, when they can obtain milk early in the day, instead of making use of the privilege offered them because of the laboring status one member of the family has. Usually the milk offered at a State Enterprise was better quality than that of the farmers; however the quality depended somewhat upon the scruples of the State Milk Center employees, since they were easily able to water the milk. The milk provided the State factories was priced at 1.50 Lei per liter.

6. " Meat: the 'Comcar' ('Comertul Carnei' - Meat Commerce) Centers have been out of existence since spring 1953. They were replaced by Meat Centers called 'Centre de Carne', each one of which bears a distinct number, and numbers are in sequence in any given city-sector. (Meat Center No. 30 is located on Calea Serban Voda No. 11, Raion N. Balescu.) Prices of meat are indicated below, in three columns; prices indicated are in Lei; quantity is the kilogram:

	Black Market	Coupons	Free
Cow-meat (vaca)			
1st category, 'Specialitati', which were 'Muschi' and 'Atricoate'	25.00	7.50	12.00

1st category	12.00	3.60	7.00
2nd category			

(Remarks: Black market meat is sold either illegally by the Meat Center employees who steal it from the Meat Center, or it is brought illegally into the city by farmers. There is always a line for meat. One can check the weight, but meat is not wrapped at the stores, so purchasers must bring their own paper. Lining up takes the same form that it takes in the sugar outlets. Meat is also sold in the private 'Tarabe' markets. [See page 1.] Prices on meat sold here are the same as black market prices, the difference consisting, only, in the fact that these farmers are authorized to sell meat as long as they have fulfilled their quotas and had the cattle slaughtered in the State Slaughter-house ('Abator', at Obor). This ensures that the farmer meets the established sanitary conditions; however, there is no sense in this very often, as the meat sold in the 'Tarabe' markets is often exposed to the sun for hours at a time. No State price controls are exercised. In the new 'Obor' Market (open market), there is a special area for farmers who bring produce in horse-driven carts; in the closed 'Obor' Market, there is a special section for 'Tarabe' sellers.)

7. "Fish: separate from the fish sections of the 'Alimentara' and 'Comaliment' State Stores, fish is sold at the State Fish Centers (called 'Compescara', or 'Comertul Pescariei') located in the markets of Bucharest, [see Para. 2, e, page one.] There were also two or three 'Compescara' Centers in the city-center which sold fish derivatives as well as fish and ready-made fish courses (at the annexed restaurant). One of these centers, No. 1, is located at the corner of '6 Martie' Blvd. and Calea Victoriei (a former Herdan-owned bar), opposite the 'Alcalay' Library (now the 'Libraria Noastra'). Fish Center No. 2 is located on Calea Victoriei opposite the 'Biserica Alba' (White Church). Fish qualities and prices are indicated below. Items were on sale freely:

Black caviar (local product)	Quantity	Price in Lei
'Netescuite' type	kg	250.00
'Tescuite' type	kg	300.00
'Batoc' (Stockfish)	kg	32.00
'Chefali Afumati'	kg	18.00
'Scrumbie Afumati'	kg	32.00
The ready-made fish courses were such as 'Ciorba de Peste' (fish-soup) and fish sandwiches. Sandwiches cost:		
Caviar		5.00
'Batoc'		4.00

8. "Vegetables: the sale of fresh vegetables and fruits takes place only in the Bucharest markets (referenced under fish above), and in the State administered 'Aprozar' ('Aprovizionarea Zarzavat' - Vegetables Supply) stores, and through the private 'Tarabe' located within the markets and legally authorized by the Communists. Prices are indicated below in two columns; one refers to 'Tarabe' (privately run) sales, and one to the State 'Aprozar' vegetable stores. None of the items below require ration cards. Prices are in Lei:

	Quantity	Private	'Aprozar'

Walnuts	kg	32.00-36.00	not available

(Remarks: occasionally the 'Aprozar' offered apples, not of Jonathan type, for sale at 2.00 Lei/kilo; when this occurred, people lined up for a long time to get a kilo. State stores always have a lower quality of goods; therefore, when people have the money, they do their shopping at the private 'Tarabe', where there is a greater choice.)

9. "In addition to the above items, the 'Tarabe' sold the following goods:

	Price in Lei
Sun-flower seed oil	20.00-25.00
Pork fat (per kg). (Price was lowered in the last period; formerly was 40.00-45.00)	25.00-32.00
Smoked meat (per kg)	40.00
Cheese	
Telemea type (per kg)	24.00
Taraneasca type (equal to that of 2nd category type sold in 'Comaliment' and 'Alimentara' State Stores - price per kg)	18.00
Eggs, per piece	2.00
Butter, per kg	35.00-40.00

In the area assigned to them, farmers sell live fowl. No live fowl is sold in State Stores. Farmers' prices for fowl are listed below:

	Price in Lei
Live chicken, each	40.00-50.00
Pullet, each	25.00-30.00
Turkey, each	90.00-100.00-130.00
Goose, each	80.00-90.00
Duck, each	60.00-70.00

25X113. [ ] [see page 1, para. 2, c.], that there was another category of prices: those in the Cooperatives. Anyone could join a Cooperative if he paid an initial 10.00 Lei and a yearly due of 30.00 Lei, payable in installments, which installments were receipted by an affixed stamp on the 'Carnet de Cooperator', (Coop membership card). Cooperative benefits were represented in a greater variety of foods than those in the State Stores, and greater availability of foods, but at prices 20% higher than State prices. (However, in December 1953, when an egg sold for 3.00 Lei in farmers' markets, and consumers fought for one egg in the State 'Alimentara' and 'Comaliment' Stores, eggs were distributed in Cooperatives, to members, at 0.65 Lei per egg. In the Cooperatives, cheese which sold in farmers' markets for 24.00 Lei/kg, could be had for 11.00 Lei/kg.) No all Cooperatives sold the same type of merchandise; i.e., one sold sugar, biscuits, oil, etc; others had fish and wine only, others even meat. There were people, in the field of labor for instance, who belonged to the Cooperative of the enterprise in which they worked and to three or four other cooperatives as well. This way they and their families had access to various kinds of food not obtainable in the State Stores and markets. The Cooperatives, actually called 'Cooperative de Consum', belonged to a central Cooperative,

('Centrocop'), located at the corner of Sarindari and Calea Victoriei (Streets). The Cooperatives have been located in various city sectors; i.e., the 'March' Cooperative is located on 30 December Street opposite the 'Dambovita' Store, the 'Victoria' Cooperative is located on Bibescu Voda Street, No. 16. (The 'Dambovita' Cooperative occupies what was formerly the Stelian Petrescu privately owned food store); the 'Flacara' Cooperative, which was formerly the Banca Republicii Populare Romane (RPR's Bank) employees' Cooperative, is also situated on 30 December Street opposite the 'Piata de Flori' (flower market).

11. Clothing prices in Bucharest. Clothing is sold in Bucharest in the following State Stores:
